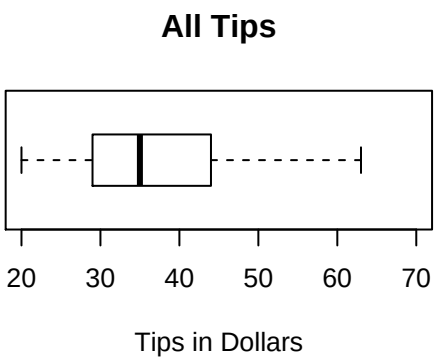
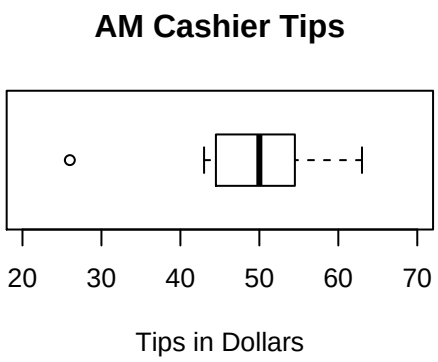
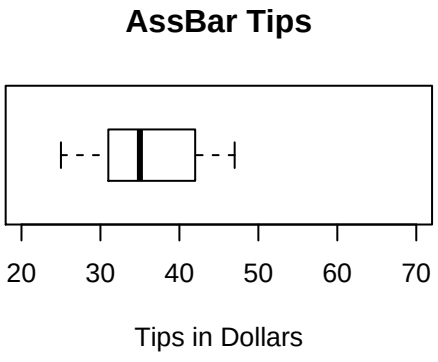
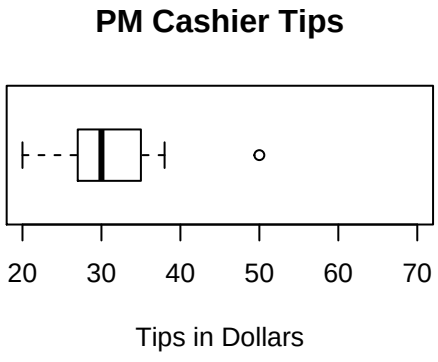
Ali's Amante Barista Stats

Boxplots



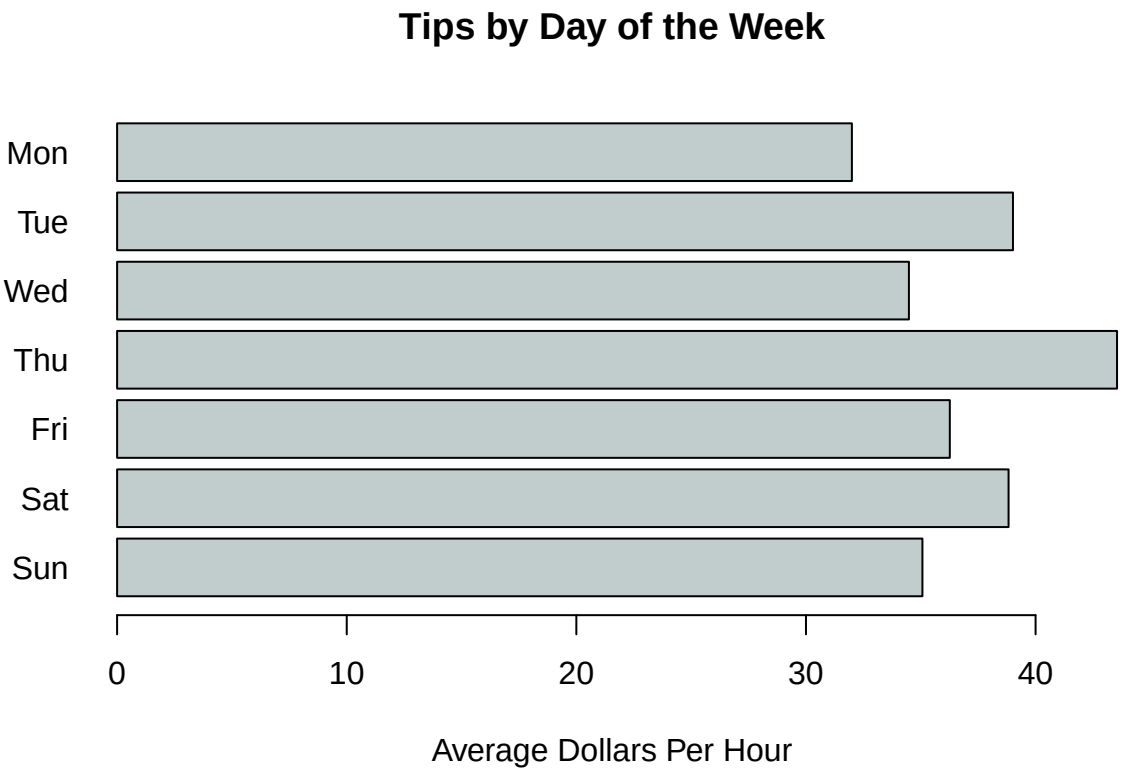




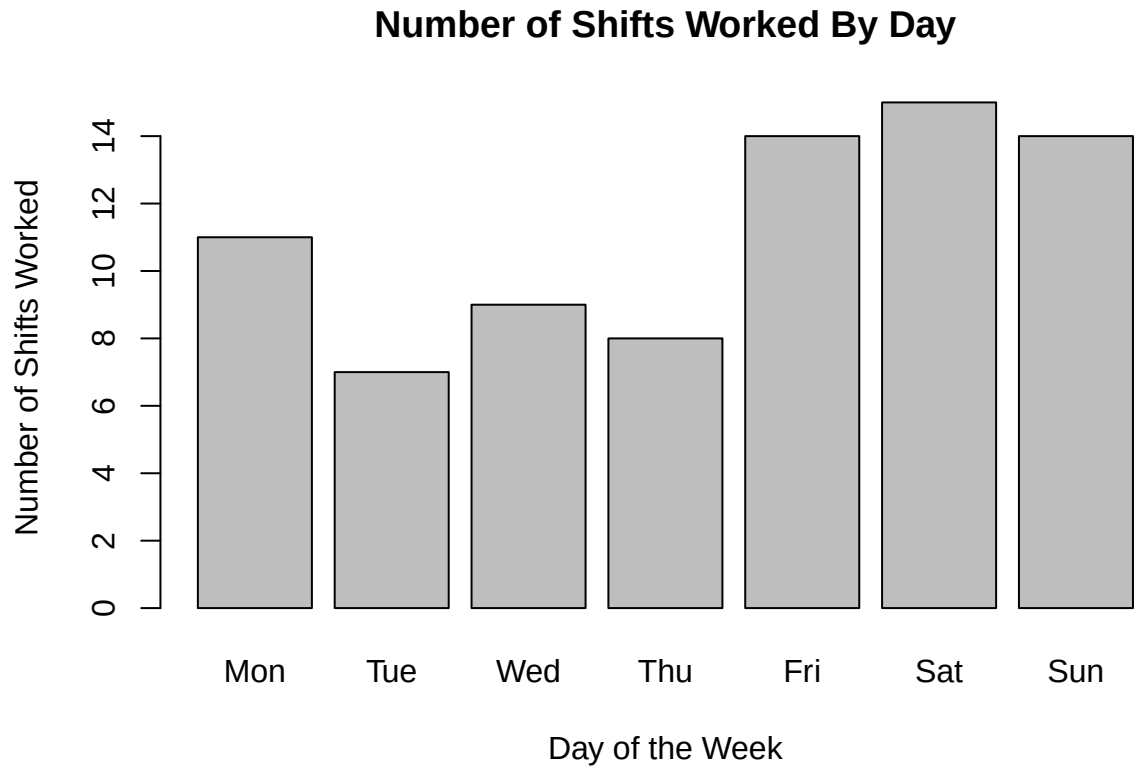


Averages

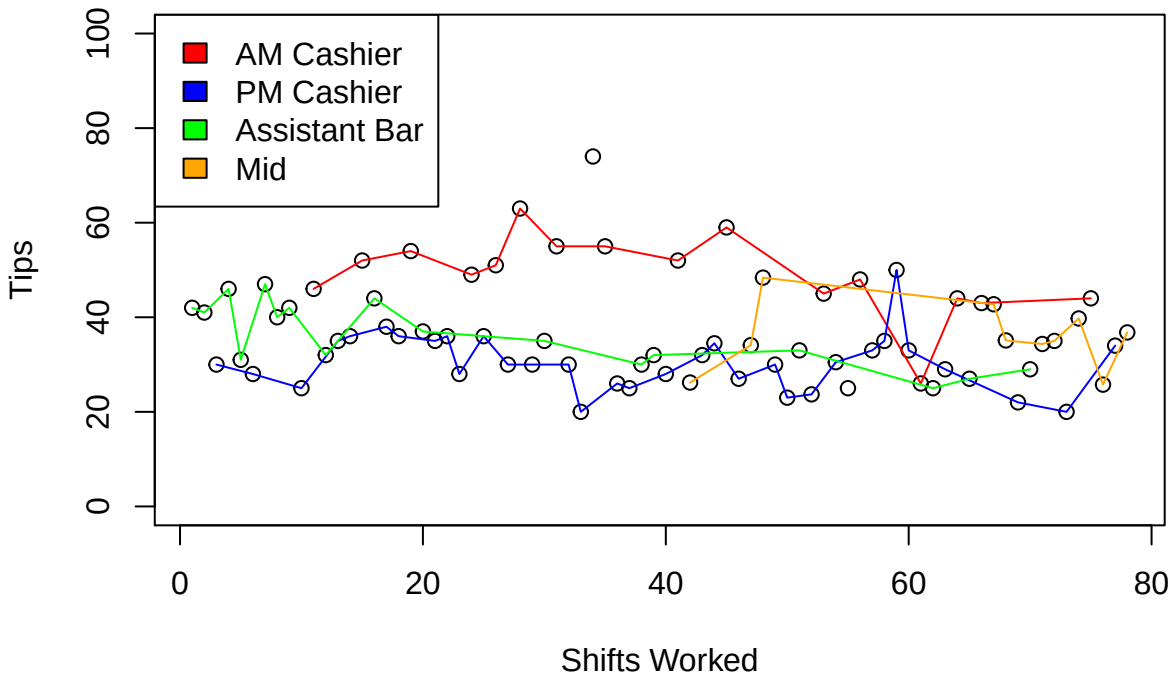
Shift	Total	Per Hour	
Overall	$36.73	$5.83	78 observations
AM Cashier	$49.12	$7.02	16 observations
PM Cashier	$30.57	$4.45	33 observations
Assistant Bar	$36.06	$7.41	17 observations
Mid (Baseline)	$35.82	$5.38	10 observations

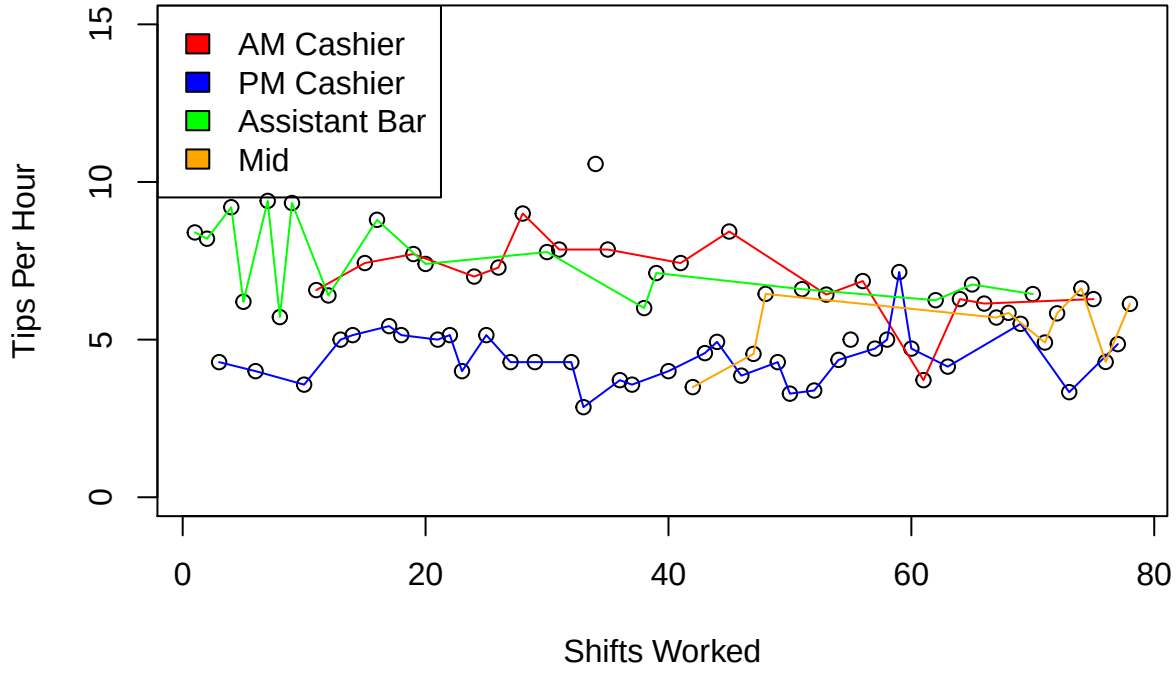


The Tuesday tip rate is inordinately high due to one of only a few observations coinciding with Thanksgiving.



Over Time (haw)





Multiple linear regression

```

Prediction for next shift

```
next.shift = data.frame(AM.PM = c('PM'), Day.of.Week = c('Saturday'), Hours = c(7.0))
prediction = predict(lmod, newdata = next.shift)
```

The model, such as it is, predicts \$31.32 $\pm$ \$6.65 in tips for the coming shift.
